DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 95/25757, cited by applicants.

3. The WO cited patent. discloses a polymerization process of polypropylene (a polyolefin) According to claim 31 and 32 and pg. 9, 1.34 to pg. 10, 1.37, thermoplastic elastomeric polypropylene having an average MW of 200,000 (within the claimed range) and an isotactic pentad content above 6 and preferably above 60 % (see also page 14, lines 22-29 and examples 40-43). Said polymer can be made into a foam (pg. 15, line 27) The method called for making said foam is well known and conventional in the art .

It would have been well within the purview of the art worker to make the claimed foamed polyolefin using the teachings of the reference.

Note that the term "form" in line 1 claim 5 is misspelled. It should read "foam".

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 1711

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
